

Vision:

Millimetric Instruments is a musical tool brand handmade in Montreal, Québec. Each instrument is made with local materials and has ecofriendly finishes. This compagny is born from the envy of building solid and reliable devices that express a new vision of form and fonction. Millimetric Intruments sees musical instruments as tools instead of luxurious and ornamental objects. Each and every detail is there for a reason and has a purpose. Minimalism is the key and gives our tools their own identities.

Millimetric Instruments TB90

*New product release at souk@sat prise 12

New from Millimetric in 2016, first model of guitar pickups. Based on a Travis Bean TB500 design, it sounds clear and bright without lacking of bass to fully translate the rich sounds of the strings. Each one is made by hand in Canada.

- alnico V rod magnetic pole pieces.
- stainless steel baseplate.
- proprietary design bobin.
- solid maple wood spacer.
- ABS brushed or frosted top plate.
- allen key set screw with brass insert.

Price: 300\$ CAD for a set.

Millimetric Instruments custom Products

Millimetric can produce a wide variety of musical accessories. Most of the time it is made to the customer's specifications and that is why there is no model to choose from. Please inquire with your custom projects such as:

- Speaker cabinet.
- Pedalboard.
- Rehousing for guitar amps, hifi amps.
- Wooden synth side kits
- Hardcases.
- Pedal enclosure.
- Pickups.
- And more...
